Fiery Embers of Spirit

To awaken the dormant fire within
Is to ignite a spark within the soul,
Touching upon something born of a
Higher nature; that yearns to convey
The deeper truths of existence. Fiery
Embers of spirit, eroding that which
Obstructs the flow of creativity. So
The mind is free to pursue ideas of
A transcendent nature. Aligning

Thought with a frequency, outside
The bandwidth of the human ear.
Creating positive change within,
That's reflected by the quality of
One's works; and the expressions
Of an infinite soul. Seeking to
Convey the timeless mysteries
Of existence; which add depth
To the overall experience of life.
